

Mr. GoodTower®

# EVAPCO WEST Mr. GoodTower® Service Center

SERVING THE CENTRAL CALIFORNIA AREA

*Specializing in  
Cooling Tower Service,  
Repair and Upgrade:*

- EVAPCO • BAC • Marley
- Recold • IMECO  
& more

Non-Chemical  
Water Treatment

EvapLiner Coating

Replacement Coils

Replacement Fans

For a **FREE UNIT INSPECTION** contact the  
**EVAPCO WEST Mr. GoodTower® Service Center** at 559-673-2207

## Qualifications/Background

The EVAPCO WEST Mr. GoodTower® Service Center is solely dedicated to the service, repair and upgrade of cooling towers, closed circuit coolers and evaporative condensers for the central California region.

The service crews are manned by factory trained and certified personnel. They are the same mechanics that have built quality EVAPCO products in the plant for many years. The service crews specialize in rebuilds and repairs and are the experts in the industry.

The EVAPCO WEST Mr. GoodTower® Service Center is licensed and insured in the state of California.

The EVAPCO WEST Mr. GoodTower® Service Center is dedicated to the satisfaction of all our customers. For over 30 years EVAPCO WEST has built quality units with a commitment to excellence. This same philosophy is a core value of our service work.

Factory Trained and Certified Service Mechanic

## Services Performed

**FREE UNIT INSPECTION** – Contact us for a, no obligation, free unit inspection regardless of the unit's manufacturer. Upon completion of the inspection, a written report will be provided which outlines the condition of the unit along with a recommended course of action.

**MEDIA REPLACEMENT** – Scaled, collapsing or damaged fill media can significantly reduce heat transfer and thermal performance. Missing or defective drift eliminators contribute to excessive drift resulting in water and chemical loss, higher operating costs and damage to surrounding buildings and vehicles. Scaled inlet louvers restrict airflow and reduce thermal performance.

Old, Inefficient, Damaged Fill

EVAPCO Mr. GoodTower® High Efficiency Fill

**REPLACEMENT COILS** – Corroded and leaking coils result in a capacity reduction. In fluid coolers there is a loss of water, glycol and chemicals and in evaporative condensers a loss of refrigerant. EVAPCO's Thermal-Pak® Coil (elliptical design) has up to 20% more surface area than other manufacturers' coils, resulting in increased capacity.

**EVAPLINER COATING** – EvapLiner is a cost effective means of extending equipment life for several years. EvapLiner will restore corroded surfaces and seal leaks. It is fire retardant, includes a mechanical and chemical bond, requires limited downtime (usually 6 hours after application) and is a flexible membrane so it will not chip, crack or peel.

Corroded Hot Water Basin

Hot Water Basin Coated with EvapLiner

**EQUIPMENT UPGRADES** – Super low sound fans, platforms and ladders, electric water level control and other upgrades are readily available.

**NON-CHEMICAL WATER TREATMENT** – The *Pulse~Pure*® System provides a non-chemical solution for scale, microbiological and corrosion. Additional benefits can include water and energy savings, eliminate chemicals, reduce treatment costs, reduce maintenance, health and safety benefits (no handling of dangerous chemicals) and it is a green product.

We are so confident in this technology that *Pulse~Pure*® comes with a one year money back guarantee.

*Pulse~Pure*® Installation on Equipment at the EVAPCO WEST Plant

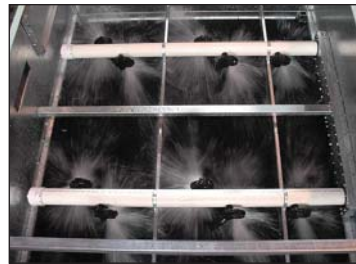

**SINGLE SOURCE PROVIDER** – The EVAPCO WEST Mr. GoodTower® Service Center provides FREE UNIT INSPECTIONS, technical advice, EvapLiner coating, non-chemical water treatment, rebuilds & repairs and parts for *all* equipment manufacturers. Contact us for *all* your evaporative cooling needs.

# EVAPCO is your BEST Parts Source for all Evaporative Cooling Equipment, Regardless of the Original Manufacturer.

## ANY PART, ANY MANUFACTURER, ANY TIME!

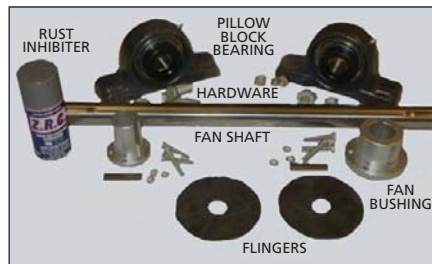

- Fill material, drift eliminators and air inlet louvers
- Replacement coils and coil/casings
- Water distribution systems, including hot water basins, spray headers and spray nozzles
- Fan assemblies, including vane axial and centrifugal
- Fan shafts, bearings, pulleys, sheaves, bushings and belts
- Gear reducers, drive shafts and drive couplings
- Fan and pump motors specially designed for cooling tower duty
- Electrical components – basin heaters, electric water level control, vibration switches, thermostats and more
- Low sound solutions – super low sound fans, water silencers and attenuation packages
- Miscellaneous – platforms and ladders, jib boom and davit, sheet metal panels and oversize access doors for some models

Water Distribution System

Gear Drive

Shaft Kit

Platform and Ladder

Super Low Sound Fan

Fan Motor

Electronic Water Level Control

**BEST LEAD TIMES IN THE INDUSTRY! COMPETITIVE PRICING!  
MATCH EXISTING PARTS! THERMAL PERFORMANCE GUARANTEE!**
