

SPRING INTO COOLING

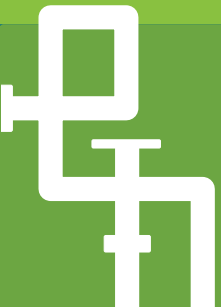

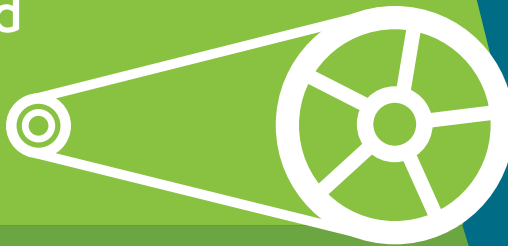

Before starting up your cooling equipment, take a closer look at these important parts. Or contact your local EVAPCO sales representative for a preseason inspection and recommendations on how to keep your unit(s) operating at peak performance!

Rotate fan shafts by hand to ensure they turn freely

Check the position and condition of belts and drift eliminators

Drain and clean basin

Inspect piping and electrical connections thoroughly

FIND YOUR LOCAL EVAPCO SALES REPRESENTATIVE FOR MORE INFORMATION
