

AIR HANDLING UNIT RETROFIT PROGRAM

The Single Source Natural Leader for LIFE

Turn-key AHU Retrofit Options Available TODAY!

EVAPCO is now offering a comprehensive aftermarket AHU retrofit program designed to upgrade existing units in the field! Complete unit retrofits are TURN-KEY solutions offered by EVAPCO through our refrigeration contractors. These retrofit solutions will make your existing units safer, more efficient, and improve the sanitary design. Examples of possible retrofit components are shown below!

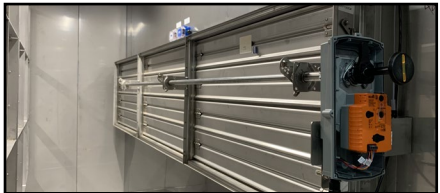

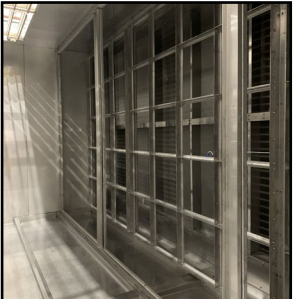

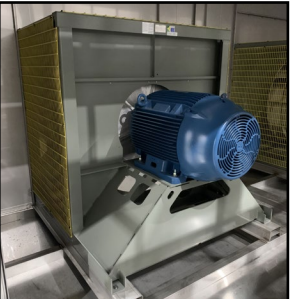

Control System Updates

EVAPCO has the capability to upgrade outdated control systems with the latest components, including PLCs, VFDs, and HMIs.

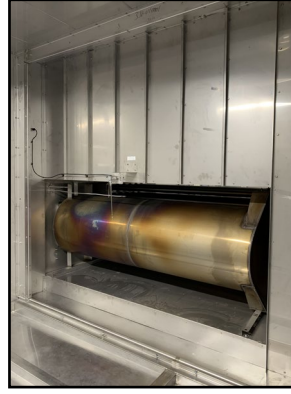

Mechanical Components

Replace worn mechanical components to ensure reliability and proper functionality of existing equipment. Also, upgrade cooling and heating coils to the latest technology to ensure the ultimate energy efficiency.

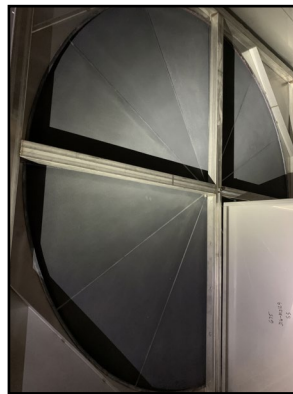

Burners & Gas Trains

Including options for both direct fired burners and indirect fired heat exchangers, advance to new and improved designs that are more energy efficient, potentially higher capacity, and incorporate current safety standards and best practices.

Desiccant & Enthalpy Wheels

With the ability to change out desiccant and enthalpy media or complete cassettes, EVAPCO can ensure the equipment has the ability to maintain the space temperatures and humidity levels it was originally designed for.
